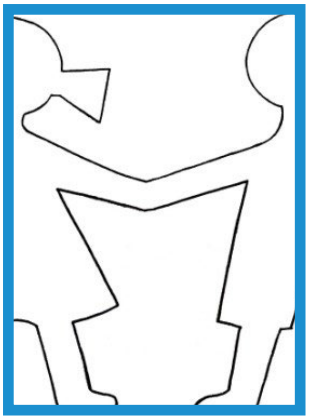
MARTY'S MISSION



When Marty finally sees a rainbow appear in the sky he races towards it. Home at last! But right before stepping onto the coloured bridge a thought catches his attention. The earth children all have his same questions; they are all searching for direction and guidance along the path of life. Why not share his experience and the findings made during his stay with them? Why not pass on the key, the bag of tools, the map, the watch, that he received at the beginning of his stay?* If all the children on the planet join their qualities of goodness and beauty, the world will become a happy world to live in!

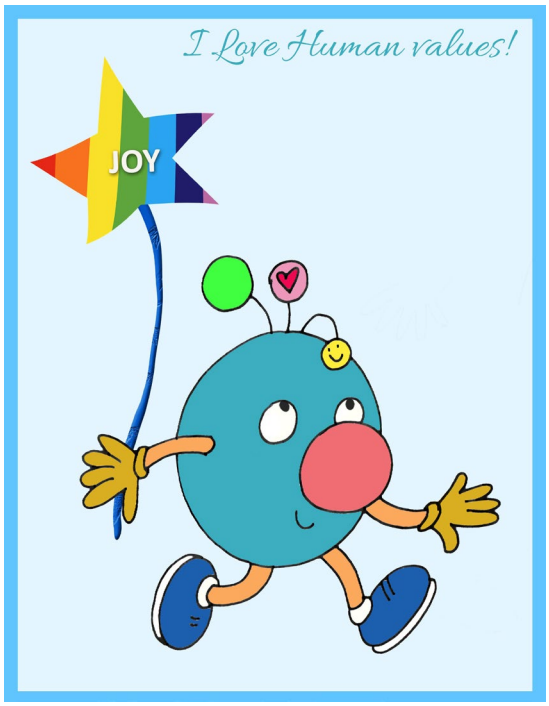
Let's join our hands and hearts for a happy world!

You need: newspaper, black marker, scissors, glue, wrapping paper, ribbons, model template.

Fold the paper like an accordion. Trace the shape of the templates (the two half figures) on the top piece of paper with the black marker. Cut the shape keeping the folds together and making sure you don't cut the folds! When you open the paper you will discover a bunch of people walking hand in hand! They want to make a happy world together! Dress the figures up and give a special quality to each of them (like kindness or respect). Remember that outer forms, languages, cultures, traditions, can be different but there is only one current that moves, inspires and animates us all. That's LOVE!

WHEN YOU WALK TOGETHER YOU CAN SING THIS SONG:

A happy world, a happy world
we will make together.
A happy world, a happy world,
our lives will be much better.
A happy world, a happy world,
will be a home for everyone.
A happy world, a happy world,
one family we will be.



Why not participate in the worldwide virtual peace walk, too, and become a **peacefriend,** like Marty!? Check out the PEACEFRIENDS project at: https://www.martyswatch.com/links-and-more
