

I've heard that truth is difficult to find. Everyone seems to have a part of it. And yet there must be a higher Truth that is the same for us all! My mission on planet Earth is to find it!

## Here is what some people have said about truth:

*Truth is tough. It will not break, like a bubble, at a touch; nay, you may kick it about all day like a football, and it will be round and full at evening.*

O.W. Holmes

*Be sincere. Truthful words are not always beautiful. Very flowery and exaggerated words are not always truthful.*

Taoismo

*I have nothing new to teach the world. Truth and Non-violence are as old as the hills.*

M.K. Gandhi

*The whole universe is a tree.*

Le Upanishad

*The wise reach truth through error; the silly insist on erring.*

Anonymous

*The mind is not a vessel that needs filling, but wood that needs igniting and then it motivates one towards originality and instills the desire for truth.*

Plutarcó

*Man's main task is to give birth to himself.*

E.Fromm
